

Band Saw Safety Picture This

10 BAND SAW SAFETY RULES FOR BEGINNERS

- 

1 TO KNOW THE BASIC

At very first, need to read and understand the guidelines procedures of running saw safely which are described in the user manual given with this band saw. From user guide, you will come to know about the different parts of the band saw as well as the safety instructions to operate it.
- 

2 PRECAUTIONS STEPS FOR OPERATORS

Your fingers, hands, eyes and ears are considered to be at risk when you run a band saw. If you don't take some precautions, Your eyes should be protected from sparks by wearing goggles and use ear protection to protect your ear from sparks and machine sound.
- 

3 MACHINE SET-UP

Check the saw if it is in a flat and strong surface so that it doesn't move or vibrate while you running. Any slight movement or vibration can pull your fingers or hands to the running blade and cut at a blink of eye.
- 

4 CAREFUL OPERATION

While cutting objects, it is a must to be alert that your fingers or hands are not coming closer to the running blade. Push your objects to the blade very carefully and keep at least 3 inch distance from the blade.
