

CDC Occupational Safety And Health Stats

An overview of occupational health and safety statistics compiled by the CDC.

1 MINUTE

A young worker (15-24 years) is injured on the job every minute in the U.S.

1 IN 3

More than 1 in 3 truck drivers who died in 2012 were not wearing seat belts.

20

OCCUPATIONAL SAFETY AND HEALTH

America can be more competitive and more productive with safer, healthier workplaces. CDC plays a critical role in this by helping prevent illness, injury, disability, and death caused by workplace exposures. Our research and practical tools help keep workers safe from work-related illnesses and injuries. We work with states and industry to improve worker safety and health.
