

CDC Vital signs Getting Blood Pressure Under Control

Infographics and other information on high blood pressure and prevention strategies.

Many missed opportunities to prevent heart disease and stroke. High blood pressure is a major risk factor for heart disease and stroke, both of which are leading causes of death in the US. Nearly one third of all American adults have high blood pressure and more than half of them don't have it under control.* Many with uncontrolled high blood pressure don't know they have it. Millions are taking blood pressure medicines, but their blood pressure is still not under control. There are many missed opportunities for people with high blood pressure to gain control. Doctors, nurses and others in health care systems should identify and treat high blood pressure at every visit.
