CHEMICAL HAZARDS

FIVE TIPS TO STAY SAFE

32 MILLION
WORKERS ARE AT RISK OF EXPOSURE TO ONE OR MORE CHEMICAL HAZARDS.

1. Always read the label on the container and follow listed precautions.
2. Know where to find the Safety Data Sheets (SDS) and never use a chemical if you are unsure of what it is and how to protect yourself.
3. Always wear your personal protective equipment when handling chemicals.
4. Know where the nearest eye-wash station is to your work area.
5. Good personal hygiene and regular workstation cleaning will help reduce the amount of chemical substances absorbed by the body.
