Chippers and Shredders – Landscaping Infographic

WOOD CHIPPER SAFETY

THE ULTIMATE GUIDE TO KEEP YOU SAFE

1

ENSURE TO READ THE MANUAL

You cannot skip this step! A manual contains information as to how to use the woodchipper and how it works. It will have information that will help you utilize the machine and stay safe.

2

WEAR THE RIGHT CLOTHES

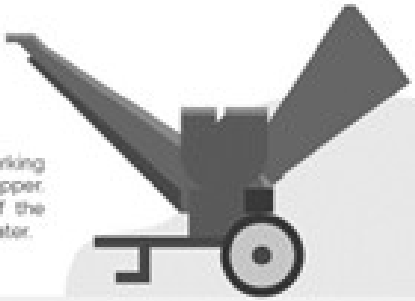

Clothes and materials, such as jewelry and belts, should not be worn when you operate a woodchipper.

Ensure that you are wearing tight-fitting clothes, so that these do not get caught in the moving parts of the woodchipper.

3

INSPECT THE MACHINE

Before you start, make sure that you do not start working the woodchipper without checking the wood chipper. There could lose hinges and the moving parts of the woodchipper could come lose and create problems later.
