Drive Safely Stats and Facts

FACTS

1. Implementing a driver safety program will help your organization keep employees safer.
2. Getting behind the wheel of your car may seem like a commonplace event, but it is likely to be the most dangerous thing you will do all day long. In the U.S., car accidents are the fifth leading cause of death.
3. You can’t control the actions of other motorists, but you have a great deal of control over how you operate your vehicle. That means you can increase your chances for a safe trip by taking necessary precautions.
4. Every time employees get behind the wheel, they need to remember the importance of using defensive driving techniques.
5. Motor vehicle accidents are the major cause of occupational deaths. Most vehicle accidents are the result of driver error or poor operating practices. Drivers assume responsibility for their own safety and that of others.
