First Aid: Environmental Emergencies

Key Takeaways:
– Learning how to respond to a chemical splash.
– Learning how to respond to a poisoning emergency.
– Understanding how to assist someone who has an animal bite or insect bite or sting.
– Comprehending how to respond to heat stroke, heat exhaustion and heat cramps.
– Understanding how to respond to hypothermia and frostbite

Course Description
This lesson will teach you how to recognize and respond to poisoning, chemical splashes, hot and cold emergencies and other environmental emergencies. There are numerous hazards which are simply out of your control in the workplace. These include the tools needed for the job, the conditions of the work, animals, and a number of natural disasters. Instead of trying to eliminate these hazards, it may be more worth your time to learn how to engage in such emergencies. This course will provide you with the knowledge on how to properly respond in a number of emergencies to ensure everyone survives the workday.
