## First Aid Safety Topic

This section addresses general first aid information including OSHA regulations and program information in the workplace.

## Overview

First aid refers to any treatment or caring for minor injuries, such as cuts, abrasions, minor burns, sprains, etc. as well as emergency CPR (cardiopulmonary resuscitation).

A well-stocked first-aid kit must be kept and accessible to all employees. As an employer, one should make a priority to have employee(s) properly trained in administering basic first aid — this to include CPR certification. It is important to note that OSHA does not require injuries that only require first aid to be recorded on OSHA injury and...
