Hand Safety – You Control It Safety Video

A hand injury occurs in the workplace every 32-seconds. Though they usually do not grab the headlines and are not fatal in nature, over 16 million individuals seek emergency care each year for hand injuries. Hands are often in the forefront of the specific task being performed and thus exposed to more risks. This video educates your employees on the different types of hand injuries that can occur, how to recognize common hazards found in the workplace and preventive measures to take to protect their hands. Safety is a personal responsibility. A hand injury can occur in a moment, but affect you for a lifetime. This program will motivate your workers to use best practices to prevent hand injuries.
