ILDCC Hazard Communication Program

A sample written hazard communication program including hazard determination and communication methods.

INTRODUCTION

We are responsible for protecting our employees from all hazardous chemicals known to be present in our workplace. We will provide our employees a reasonable safe place in which to work and instruct employees in safe work practices. Employees have a responsibility to learn and follow the sensible procedures we have established to ensure basic awareness of hazards in our workplace. To ensure that all avenues are addressed, we have established the following written hazard communication program.

Insert name of person or job title of person designated here has been designated as our Hazard Communication Program Coordinator (HCPC) and will be responsible for seeing that all aspects of our program are carried out in the fashion intended. A copy of the program will be available in the HCP’s office for review by…
