Load Securement – Web Belts Infographic

6 Tips to Keep Cargo Securement Tie-Downs in Proper Working Condition

1 Cover Up the Corners

Use corner protectors to protect straps and cargo from damage.

2 Clean, Dry and Store

Rinse or soak in water, Do not use bleach, harsh chemicals or brushing. If straps cannot be cleaned with a mild detergent, they should be replaced.

3 Keep Equipment Dry

Keeping chains, webbing and hardware dry is important to maintaining their integrity.

4 Get the Tough Stuff

Use tie-downs with extra abrasion-resistant webbing to secure difficult loads.

5 Don't Let Them Drag

Keep your straps off the ground and secure excess webbing to prevent damage.

6 Know When to Replace

Examine tie-downs and other cargo control equipment before every load to make sure they are in safe working condition.
