LPI Lightning Protection Brochure

A brochure on how to protect your commercial property from lightning damage.

Established in 1955, the Lightning Protection Institute (LPI) is a national not-for-profit organization comprised of manufacturers, contractors, and designers including architects and engineers. LPI provides national certification of lightning protection system installations, as well as certification of professional members who qualify in terms of experience and knowledge. The certification of a lightning protection system’s design and installation is paramount to maintaining quality control and upholding industry standards.

Certification assures national safety standards for installation are met, as set forth by the National Fire Protection Association (NFPA 780) and…
