# AVOID PESTICIDE EXPOSURE WITH PROTECTIVE CLOTHING

Even a “natural” or low toxicity product can cause harm if a person is exposed to it. Minimize your risk by using personal protective equipment (PPE). Different products may need different PPE. Always read and understand the label before using pesticides.

**Always wear long sleeves and pants**

- Wash contaminated clothing separate from other clothes
- Wear hats or bandanas for more skin coverage

**Use safety glasses or goggles**

- Store eye protection out of the sun
- Clean contaminated eyewear immediately

**Check the label for extra instructions**

- Inspect regularly for holes or tears
- Different gloves provide different levels of protection
- Discard disposable gloves after every application or use

**Wear closed-toe shoes with socks**

- Easy-to-clean shoes can limit residue transfer

**KEY POINTS**

- Always follow the label
- Do not store PPE with personal clothing
- Do not store PPE and chemicals together
- Wash protective clothing separately from other laundry
