

Portable Fire Extinguishers Infographic

Steps to using a fire extinguisher:

NOTIFY Activate the building alarm system and dial 911 to notify the fire department, or have someone else make the call if you can't.

EVACUATE Help people in immediate danger or incapable of exiting the building on their own without risking your own safety.

EXTINGUISH Extinguish the fire yourself after calling 911 and evacuating others from the building.

When it's time to use a fire extinguisher, just remember P.A.S.S.

PULL the pin.

AIM the nozzle or hose at the base of the fire from the recommended safe distance.

SQUEEZE the operating lever to discharge the fire extinguishing agent.

SWEEP the nozzle or hose from side to side until the fire is out, starting at the recommended distance. Move forward or around the fire area as the fire diminishes. Watch the area in case of re-ignition.

The infographic features a large fire extinguisher on the right side. To its left, the P.A.S.S. acronym is written in large, bold letters. Below each letter is a detailed illustration of the corresponding step: 'PULL' shows a hand pulling the pin; 'AIM' shows a hand aiming the nozzle at a fire; 'SQUEEZE' shows a hand squeezing the lever; 'SWEEP' shows a hand sweeping the nozzle from side to side. The background is a light grey with a subtle pattern.
