PPE – Personal Protective Equipment: Hearing Protection

Key Takeaways:

- Appreciating the value of hearing PPE
- Observing common hearing workplace hazards
- Observing the common characteristics of hearing PPE
- Recognizing common types of hearing PPE
- Understanding the proper fit for hearing PPE
- Learning how to care for hearing PPE
- Acknowledging employee and employer responsibilities regarding hearing PPE

Course Description

Annually, there are 23,000 cases reported of occupational hearing loss great enough to cause hearing impairment because the proper Personal Protective Equipment (PPE) wasn’t used for hearing protection.

This course was designed to teach workers how to recognize, identify and describe the proper types and uses for hearing protective devices. How would your life be different without being able to hear? It is important to protect your ears from damage and pain that can change your life.
