

Spiders – Picture This

Did You Know?

Arachnophobia, or the fear of spiders, is the second top phobia people suffer from!

Spiders can be found anywhere in the whole world.

Spiders avoid people and will typically bite only when cornered or threatened.

In North America, **2,500** different species of spiders can be found!

More than **43,000** different species of spiders are found in the world.

Of these, only a small number are said to be dangerous, and less than **30** have been responsible for human deaths.

Minnesota is among the states that could become part of the expanded territory of “**one of the most feared spiders in North America**”.

Along with the most commonly found, the **Northern Black Widow**, Minnesota is also the home of 7 Venomous Spiders.

Let's explore these tiniest threats of Mother Nature

The 7 Venomous Spiders in Minnesota!
