

Think of the Next Person Picture This

Safety at work.

Know the facts so you don't become a statistic.

66 

MEMBERS OF THE PUBLIC DIED AS BYSTANDERS to someone else's work activity in 2013

63% 

of serious claimants are MALE
2012-13

It only takes
15 MINS

A WEEK TO SUFFER HEARING DAMAGE from noise levels above 105dba.

Think a table saw or stadium sporting match

EYE INJURIES result in around
500 HOSPITAL ADMISSIONS PER YEAR

28% 
of office workers DON'T KNOW if they have a safety expert on site

17% 
of office workers say their workplace DOES NOT communicate safety plans effectively

If you're as little as
5% 
DEHYDRATED your alertness and concentration is reduced
30-40%

THE MAJORITY OF WORK FATALITIES ARE CAUSED BY:

VEHICLE COLLISION

BEING HIT BY FALLING OBJECTS

FALLS FROM A HEIGHT

BEING HIT BY MOVING OBJECTS

LARGEST PROPORTION OF SERIOUS INJURY CLAIMS

WATCH YOUR STEP

Falls, trips & slips caused
26,135 SERIOUS CLAIMS

WORK-RELATED DEATHS ANNUALLY ARE

3x MORE

THAN ROAD FATALITIES IN AUSTRALIA

INDUSTRIES WITH THE HIGHEST **DEATH RATE** (2014)

1. Transport, postal & warehousing
2. Agriculture, forestry & fishing
3. Construction
4. Mining

INDUSTRIES WITH THE HIGHEST SERIOUS **INJURY RATE** (2013)

1. Transport, postal & warehousing
2. Agriculture, forestry & fishing
3. Construction
4. Mining

As of September 2015

2012-13
