

Pre-Use Inspection Checklist for Hand and Power Tools

Before using hand tools inspect for the following:

- ☐ The outside of the tool is free of grease, oil and accumulated foreign matter
- ☐ The tool has no visible cracks in jaws or handle
- ☐ Blades or bits are not damaged, cracked, etc.
- ☐ Handles are not cracked, damaged or loose from heads of hammers, axes mauls and other similar tools
- ☐ Tips of screwdrivers, chisels or other similar tools show no excessive wear
- ☐ Gripping surfaces pliers, wrenches or other similar tools are not worn
- ☐ Tools such as chisels and punches do not have mushroomed heads
- ☐ Cutting tools such as chisels and axes are sharp
- ☐ Tool appears to be in generally good condition

Before using power tools inspect for the following:

- ☐ The outside of the tool is free of grease, oil and accumulated foreign matter
- ☐ Tool power-source shows no damage (cord, airline, battery, etc.)
- ☐ Tool is double insulated and tool housing is not damaged
- ☐ If so equipped, electrical cord third prong (ground) is intact
- ☐ All shields, guards or attachments required by OSHA or manufacturer are present
- ☐ Rotating or moving parts of tool are guarded to prevent physical contact
- ☐ Tool is not leaking fluid such as gasoline, oil etc.

☐ Blades or bits are not damaged, cracked, excessively worn, etc.

☐ Tool appears to be in generally good condition

☐ Proper PPE is available

Some portable power tools require a more thorough inspection. Check the manufacturer's recommendation for more advanced power tools. For a more detailed list click here:
