4. Before using a pulley system, what should you do first?

5. If the pulley system is equipped with a brake that's recently been inspected, then it's safe to stand below the raised load.
True False

What Would You Do?

You're on the ground, waiting for objects to be lowered to you by co-workers on an upper elevation. You heard one of them shout down something, but a truck went by at the same time and you didn't make out what they said. You've asked for them to repeat the call, but have heard nothing further. What should you do?
